•	ally get the real meaning of these lines:Don't waste food.
	A CCTV programme, News One Plus One, reported that the food Chinese people throw

I started my school life at the age of six. At first the school for me — a boy, meant play, play and more play instead of sitting in the classroom and learning something. However, I changed the way I used to behave at school with the help of my teachers. I tried my best to do well in my schoolwork and follow the school rules.

Growing and learning were great fun. Every year we had different kinds of school trips. Not only could we learn many things from them, but also we were given many projects as homework. It helped us know more. At the same time, we made many good friends. In Grade 7, I won prizes in drawing and English speech competitions. When I was in Grade 8, I realized that I should give more attention to studying to get a better grade. That will make my parents and teachers happier.

Whenever I think of my school life, I feel very happy and I think in everybody's school life there are many ups and downs that influence (影响) his life. School is a place where all of us learn to care and share. "School" is not just a place, but a large building made up of rules, knowledge and love. I think in everybody's success, school plays a key role. I can describe my school in "Three Ss". They are:Small, Sweet and Simple.

I think my school was the best and will always be the best.
