六、Choose the best answer.

30. A blind boy sat on the steps of a building with a hat by his feet. He held up a sign which said: "I am blind, please help." There were only a few coins in the hat.

A man was walking by. He took a few coins from his pocket and put them into the hat. He then took the sign, turned it around, and wrote some words. He put the sign back so that everyone who walked by would see the new words.

Soon the hat began to be full of coins. A lot more people were giving money to the blind boy. That afternoon the man who had changed the sign came to see how things were. The boy recognized (辨认出) his footsteps and asked, "Were you the one who changed my sign this morning? What did you write?"

The man said, "I only wrote the truth. I said what you said but in a different way."

What he had written was: "Today is a beautiful day but I cannot see it."

Do you think the first sign and the second sign were saying the same thing?

Of course both signs told people the boy was blind. But the first one simply told people to help by putting some money in the hat. However, the second one told people that they were able to enjoy the day. It told them they were lucky and they were not blind.

There are at least two lessons we can learn from this simple story.

The first is: Be thankful for what you have. Someone else has less. Help whenever you can.

The second is: Think differently. There is always a better way!

九、Answer the following questions.

33. Have you ever recycled? To recycle is to take rubbish and make it into something new. Recycling makes rubbish into something useful, so it is good for our environment. Recycling often helps to clean up the litter that makes our streets dirty.

We can recycle all kinds of things. The most common materials like glass, plastic, paper, metals, cloth are all recyclable. Sometimes these things are broken down (降解) to make the same kinds of things. An example of this type of recycling is using paper to make more paper. Rubbish can also be broken down to make completely new things, too!

We can recycle some materials forever. Glass is one of them. We use glass things, then break them down and use them again and again. Aluminum cans (铝罐) are one of the most useful recycled metals. We can recycle them again and again. We have recycled nearly 60% of all aluminum can.

A family of four can make nearly 2, 000 pounds of rubbish each year. As time goes on, we have fewer places to put all the rubbish in. Recycling is one way to limit (限制) the amount of rubbish we need to put into the land.

The next time you throw a can or bottle into the rubbish bin, look to see if there is a recycling sign on the label (标签) or on the bottom.

(1) Why is recycling good for our environment?

_____.

(2) According to the passage, can we recycle glass bottles forever ?

_____, _____.

(3) How many aluminum cans have we recycled?

_____.

(4) What can be the best title for this passage? (In no more than 10 words)
